# Building Relationships through exceptional Service

---

Market leaders rely on CCF's flexibility and quality to help them grow their brands. Our customers manufacture products for a expanding markets that demand exceptional processes and tight communications between suppliers and OEM's.

CCF is experienced in delivering on time to some of the world largest OEM's demonstrating the flexibility of our capabilities. We service Tier1 and Tier2 suppliers in industries like Heavy Truck, Energy Distribution equipment, Medical Devices, Automotive, Watercraft, Aerospace and Agricultural Equipment.

## Complete Solutions

---

We provide a complete solution to your specialized requirements. We design and build tooling and fixtures that will improve quality and reduce overall costs. We will take an active role in the design and specification of your application including custom packaging.

## Flexibility, Control and Experience

At Carolina Custom Finishing we've established a reputation for quality in the industry. We are committed to the customer and work with a diverse customer base. The Company has had strong growth every year confirming the demand for high quality custom finishing.

With CCF our customers have flexibility and confidence that their products are shipped on time and to specification.

Our ability to work with engineers at the design stage makes us a great fit for new projects and our multi location facilities gives us the capacity to service high volume demands.

**Our customers satisfaction is important to us and exceeding today's tough finishing standards is always our goal.**

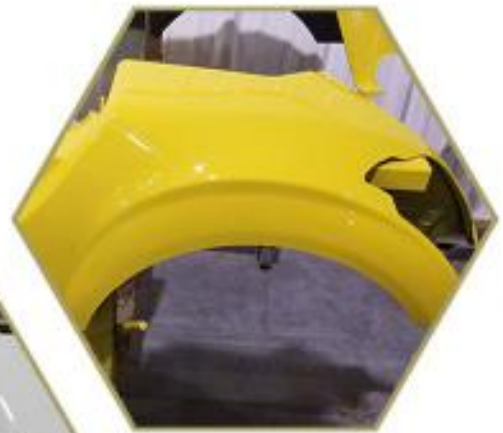

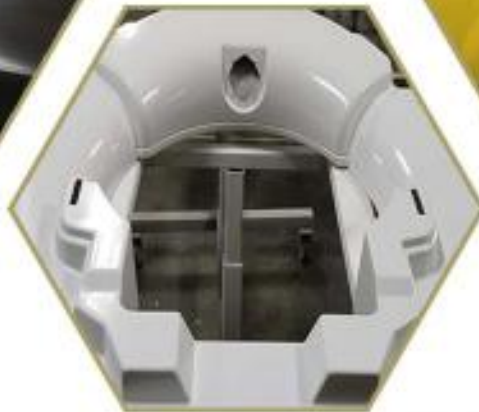

You can have confidence  
that your product goes to your  
customer in a seamless manner.

## Wide Variety of Finishes

CCF offers a wide variety of finishes on virtually any kind of substrate material. We are experts at finishing thermoplastic components (injection molded, thermoformed, blow molded or structural foam) as well as sheet metal, die-castings, powder metal components, e-coated parts, fiberglass and thermoset plastics.

**We provide a complete solution  
to your specialized requirements**

We will take an active role in the design and specification of your application.

## Pinstripe/decals/logo application

We are experts at bringing your parts to life and if you need custom post paint applications that identify your brand, give us a call, we can handle your project.

## Buffing and enhancement

We are the best in the business when it comes to enhancing solutions that is not only eye catching, but will also give that ridged gloss standard to help with your issues.

## Line sequencing capabilities

Most customers today have critical production and demand schedules that need to be considered when designing a finishing process. We can develop custom line sequencing to meet our customers production schedules.

CCF takes pride in being an extension of our customer's production operation.
